

NS-37 GRIP

Connecting the grip to the Virpil base

1. Connect NS-37 grip to Virpil base

Software

2. Launch VPC Configuration Tool

3. Update Virpil base firmware if necessary

[FLIGHT GRIP] VPC Constellation ALPHA

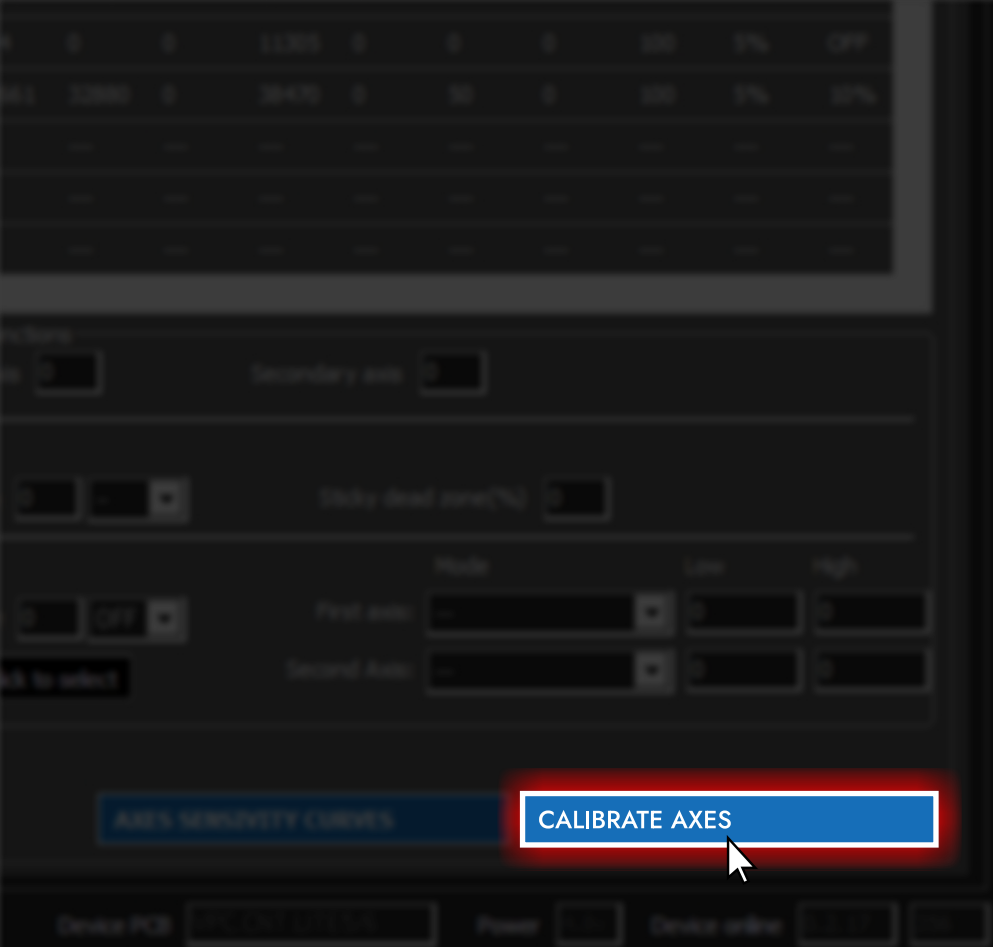

4. In the drop-down list, select the grip Constellation Alpha

AXIS

5. Calibrate the axes

5.1 Start calibrating axes

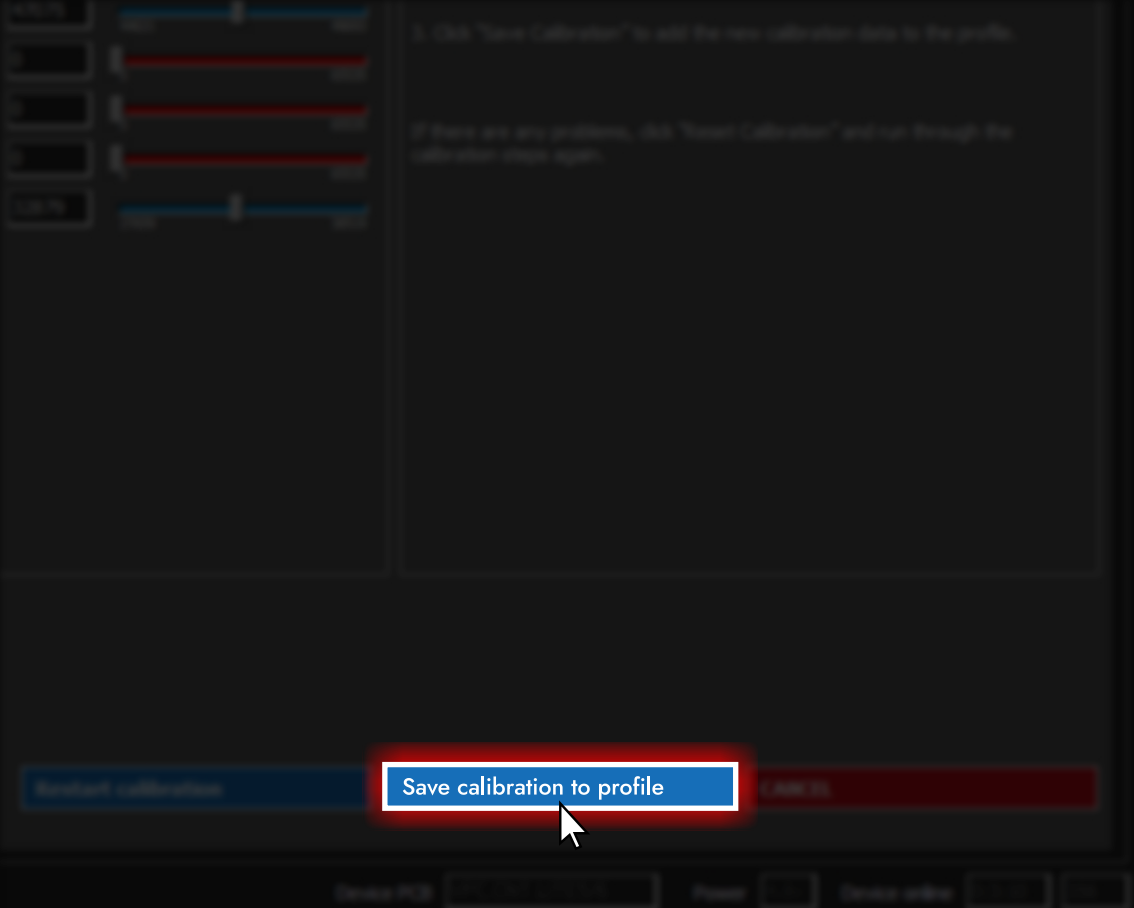

Axes calibration instructions

1. Slowly move all axes to their minimum and maximum positions.
2. Return all axes to their center/neutral position.
3. Click "Save Calibration" to add the new calibration data to the profile.

If there are any problems, click "Reset Calibration" and run through the calibration steps again.
